Compassionate Care Comes Home

What is Home Healthcare?

Home healthcare offers a wide range of healthcare services that can be administered in the home if you are recovering from a surgery, or dealing with a newly diagnosed or chronic illness. Home Health services typically include skilled nursing, physical therapy, speech therapy, occupational therapy, medical social work and in-home aide services.

What Can I Expect?

A comprehensive assessment resulting in a treatment plan that you and your family will participate in and is overseen by your physician.

The treatment plan will include:

- A fall risk assessment and home safety evaluation.
- Education on all of your medications and potential side effects.
- Education on your medical condition and methods for self management.
- Communication with your physician on your progress toward your treatment goals.
- Skilled nursing and/or therapy treatment.

What Do I Need to Know?

- Your first visit will be the longest, as we will focus on your initial assessment.
- Make sure you have all medications readily available on your first visit.
- Pay close attention to your caregiver's instructions and adhere to the plan of care. Subsequent visits will be based on the plan of care.
- Your Home Health nurse or therapists will be available for any questions.

How Much Does Home Healthcare Cost?

Doctor ordered Home Health is typically covered 100% by Medicare; you may have a co-pay with some other insurances. We will inform you of any cost to you prior to starting care.

We know you have a choice. At Elevate Home Health, our 5 Star Quality Rating ranks higher than the national average leading to improved patient outcomes, increased patient satisfaction and fewer visits to the hospital. Patient-centered and compassionate care are at the core of everything we do.
